

Functional Neurological Chiropractic Evaluation of Children

Dr. Bobby Doscher
CEO/ President

- Chiropractic detection of early signs of neurological problems
- Seeing the small changes & relating them to parents to continue care
- How subluxation creates functional neurological disorganization manifesting in cerebral palsy, failure to thrive, asthma, diabetes, ADD, autistic spectrum etc.
- Learn how to evaluate and close the gaps between a child's neurological age and chronological age with chiropractic.

The purpose of this instruction is to provide doctors and the public alike with a better understanding of the implications of subluxation in children showing neurological disorganization.

Saturday, December 20, 2008

Seminar: 2 p.m. - 5 p.m.
\$100

Saturday, December 20, 2008

5 pm – 7 pm

Sunday, December 21, 2008

2pm-4pm
